May 26, 2020

Dear Valued Customer,

As you may be aware, Public Service Electric and Gas Company (PSE&G), along with its contractors, has begun construction activities along the existing electric transmission right-of-way, in proximity to your property in Chesterfield, as part of the Metuchen-Trenton-Burlington (MTB) transmission project.

On or about Thursday, June 4, 2020, PSE&G and its contractors will utilize helicopter crews to help install the MTB transmission line from the second transmission structure just south of Ward Avenue to the transmission structure near Bordentown Crosswicks Road. The schedule for this activity is an estimated timeframe and may be slightly adjusted.

The helicopter activity in Chesterfield is expected for a four-day period, from 9 a.m. to 6 p.m., weather permitting. This activity entails pulling a rope from one transmission structure to the next using a small helicopter. Brief and intermittent road closures are expected along Shanahan Lane and Bordentown Road in Chesterfield.

Safety is our highest priority at PSE&G. It remains essential that you and anyone occupying your property refrain from going on the right-of-way during construction. Traffic control will consist of police and Traffic Safety Services (TSS). A comprehensive health and safety plan is in place.

PSE&G has secured the required permits and approvals from state and federal agencies, including the Federal Aviation Administration, and any other applicable state, municipal, county and regional agencies.

PSE&G truly appreciates your understanding and patience during this construction Project. If you have any questions or concerns, please call our Project Hotline at 1-888-431-0555. For more information, you may visit the project website at pseg.com/mtb.

Sincerely,

Jaye Cavallo
